# JAMES THOMAS DAVEY

## **Accessibility Analyst**

Seattle, WA | james.davey@fastmail.com | (415)-307-8703

Digital accessibility expert with DHS Trusted Tester certification, specializing in front-end web development, WCAG and Section 508 conformance, and educating developers to improve usability in the digital sphere.

#### WORK EXPERIENCE

Jul, 2020 - Present

## Kaiser Permanente, Accessibility Design Specialist (Contract)

Responsible for design reviews and risk assessment for in-development components on Kaiser's front page and sitewide, to be used by millions of current and future members.

- Collaborated with the design team to maximize accessibility and usability of components before handing off to the development team.
- Defined new accessibility optimizations for Kaiser's design system documentation, upholding their high standards as a healthcare industry leader.

Mar, 2019 - Present

# Level Access, Senior Accessibility Analyst

Responsible for conducting accessibility audits to comply with legal standards, helping organizations to minimize risk for their websites, mobile applications, and software.

- Oversaw long-term projects and maintained strong client relationships, resulting in multiple future sales and service product renewals.
- Led remediation efforts to meet WCAG success criteria, providing guidance ranging from high-level direction to code-level recommendations.
- Authored VPAT documents following comprehensive audits within tight deadlines, enabling organizations to sell into the federal government
- Trained large teams of developers and designers from Fortune 500 companies.

Mar, 2018 - Mar, 2019

## Freelance, Web Developer

- Built websites using VanillaJS and JavaScript frameworks and libraries such as React, Mongoose, and Express with Node.js.
- Implemented advanced JavaScript concepts such as promises, async/await, callbacks, recursion, and closures.

Mar, 2016 - Mar, 2018

#### Orange Photography, Digital Tech

- Edited, organized, and optimized digital assets for online and print delivery in large volumes.
- Wrote documentation for software, camera, and lighting of complex studio setups, streamlining the creation of marketable photo products.
